GE 1076H-N Recessed Contact

The GE 1076 N Series Steel Door contacts are designed specifically for use in the steel doors commonly found in commercial building applications. The unique housing design features a rugged unibody construction with flexible ribbed sides for quick, secure installation without gluing. The magnet housing isolates the magnet from the surrounding steel for maximum gap distances, both make and break. Both contact and magnet plastic housings are constructed of one piece of thick-walled ABS plastic for maximum strength and durability.

Features:
- Form C, SPDT (capable of normally closed or normally open)
- Three different colours available: natural white, grey, or mahogany brown
- With 12”/30 cm wire leads
- Designed specifically for use in steel doors
- Self-lock mounting
- Special ribbed sides allow for easy installation
- Rugged unibody construction for maximum durability and reliability
- UL approved for specific fire doors
- 15/16” diameter mounting hole required
- Standard Gap: Approximately 1/2” in steel, 1” in wood

Optional: Can be used with 1840-N Rare Earth Magnet for doors with channel opening. When using 1840-N Gap is 5/8”.
